A-17 Replacement of Specialized Apparatus in CAD

PURPOSE

When a piece of specialized equipment such as Trucks, Brush Engines, Light & Air units or Rescues go out-of-service (OOS), reserve apparatus is used to replace them temporarily. These replacement units are still considered specialized equipment and shall possess essentially the same capabilities and functions as the front-line unit being replaced.

PROCEDURE

The dispatch center shall be advised of the change whenever a replacement apparatus is placed into service. The dispatch center will configure the apparatus in CAD as needed.

It is the responsibility of the agency to notify the dispatch center when the replacement apparatus is no longer in use.
